1 About Our Repositories

Our Git repositories here are structured as "GitHub Organizations". To us, GitHub organizations are simply collections of repos. For example, BISOS Organization includes repos related to BISOS. This ReposOverview describes the structure of the organizations.

2 About Mohsen Banan

Mohsen Banan is the primary maintainer of all github-organizations and repositories described here. He is a software and internet engineer. Additional information about him is available at: http://mohsen.1.banan.byname.net. You can contact him at: http://mohsen.1.banan.byname.net/contact.

Mohsen is the primary architect of ByStar software and internet services.

3 About ByStar: The Libre-Halaal ByStar Digital Ecosystem

The Libre-Halaal ByStar Digital Ecosystem is an autonomy and privacy oriented digital ecosystem that is built on purely open-source and free software.

4 About BISOS: ByStar Internet Services OS

BISOS: ByStar Internet Services OS is a layer on top of Linux that functions as a base platform for all ByStar services and usage environment.

5 About UNISOS: Unix Internet Services OS

UNISOS: Unix Internet Services OS is the generalized layer of BISOS that provides non-ByStar specific facilities.

6 About Blee: Bystar Libre-halaal Emacs Environment

Blee: Bystar Libre-halaal Emacs Environment is the usage layer of ByStar.
